DEEP CLEANS CANADA

Our Disinfecting Portfolio

The EMist Electrostatic Application Systems use patented technology to apply disinfecting solution to environmental surfaces with precision.

It generates a charged electrostatic mist that adheres to all surfaces regardless of irregularity, providing 100% coverage 100% of the time. Their solution is highly effective against 99.99% of all viruses and bacteria, including COVID-19. This mist does not remain suspended in the air, leaving the air fresh and breathable immediately after application.

Electrostatic spraying has drawn increased interest through the public health emergency because of the need to disinfect large indoor spaces (e.g., schools, offices, businesses) or areas with many surfaces. The positively charged disinfectant is attracted to negatively charged surfaces, which allows for efficient coating of hard nonporous surfaces.

Thymox has demonstrated effectiveness against human coronavirus strain 229E.

Thymox disinfectant spray (EPA-87742-1) has demonstrated effectiveness against human coronavirus strain 229E and is expected to inactivate the SARS-CoV-2 (the virus that causes COVID-19).

Listed on Health Canada's website as an effective disinfectant for COVID-19.

WHY USE EMIST?

Per EPA, Positively Charged for Efficient Coating

DISINFECTS 100% OF SURFACES FASTER AND MORE EFFICIENTLY

It generates a charged electrostatic mist that adheres to all surfaces regardless of irregularity, providing 100% coverage 100% of the time. Their chosen solution is highly effective against 99.99% of all viruses and bacteria, including COVID-19. This mist does not remain suspended in the air, leaving the air fresh and breathable immediately after application.

**The leader in commercial,
industrial, institutional and
residential disinfection.**

Whether it's an assisted living facility, clinic or hospital, running a healthier operation begins with a healthier environment. EMist® was developed to help healthcare organizations reduce infections and improve patient outcomes while reducing costs.

TECHNOLOGY MATTERS

EMist TruElectrostatics TruDisinfection™ Sprayers provide a positive charge to droplets. As droplets leave the electrostatic sprayer nozzle, they race to find their oppositely charged surfaces, this causes them to spread out and wrap around three-dimensional objects.

EM360™ Electrostatic Disinfectant Backpack Sprayer

- SKU# EM36-BPBD-2825
- Cordless Backpack
- 54,000 high-touch point sq ft per hour

Price: \$6,475 + HST

EM360™ Electrostatic Disinfectant Sprayer

- SKU# EPIX360-HH
- Cordless Handheld
- 8 ounce tank
- EPIX grounding technology

Price: \$2,500+HST
